BEHRINGER®

MERV 11 Extended Surface Pleat

Standard Capacity

Behringer's extended surface area pleated filters are high efficiency panel filters manufactured using heavy duty moisture-resistant beverage board frames that are coated with adhesive and bonded to the media to prevent air bypass. The 100% synthetic filter media is made of thermally bonded, continuous hydrophobic polyolefin material that will not shed fibers or absorb moisture. The filters are electrostatically charged, which provides higher initial efficiency with reduced resistance to airflow. No chemical binders are used during the manufacturing process. The MERV 11 extended surface pleats are MERV 11 rated according to ASHRAE 52.2 standards.

Features and Benefits

- Electrostatically charged synthetic media
- Moisture-resistant beverage board frame
- High dust-holding capacity
- 40% More allergen capture than MERV 8 filters
- Low resistance to airflow
- Does not promote microbial growth
- Available in 1", 2", and 4" depths
- 100% Synthetic media material

Understanding MERV Ratings

Standard 52.2 Minimum Efficiency Reporting Value (MERV)	Composite Average Particle Size Efficiency, % in Size Range, µm			Typical Controlled Contaminant
	Range 1 0.30 to 1.0	Range 2 1.0 to 3.0	Range 3 3.0 to 10.0	
16	$95 \le E_1$	$95 \le E_2$	$95 \le E_3$	**0.3 to 1.0 um Particle Size** All bacteria, Most tobacco smoke, Droplet nuclei (sneeze), Cooking oil, Most smoke, Insecticide dust, Copier toner, Most face powder, Most paint pigments
15	$85 \le E_1$	$90 \le E_2$	$95 \le E_3$	
14	$75 \le E_1$	$90 \le E_2$	$95 \le E_3$	
13	$50 \le E_1$	$85 \le E_2$	$90 \le E_3$	
12	$35 \le E_1$	$80 \le E_2$	$90 \le E_3$	**1.0 to 3.0 um Particle Size** Legionella, Humidifier dust, Lead dust, Milled flour, Coal dust, Auto emissions, Nebulizer drops, Welding fumes
11	$20 \le E_1$	$65 \le E_2$	$85 \le E_3$	
10	N/A	$50 \le E_2$	$80 \le E_3$	
9	N/A	$35 \le E_2$	$75 \le E_3$	
8	N/A	$20 \le E_2$	$70 \le E_3$	**3.0 to 10.0 um Particle Size** Mold spores, Hair Spray, Cement dust, Powdered milk, Pudding mix, Dusting aids

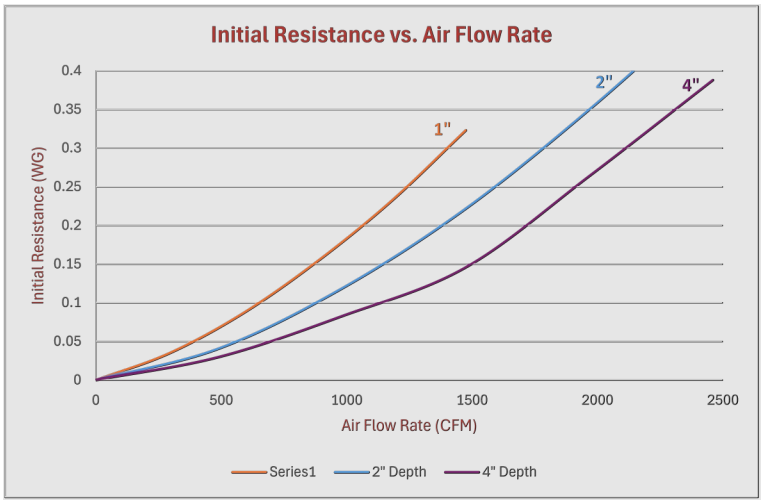
Specifications

Filter Depth	Velocity (FPM)	Air Flow Rate (CFM)	Initial Resistance (in. w.g.)	Pleats per Linear Foot
1"	300	1200	0.232	18
2"	500	2000	0.350	15
4"	500	2000	0.263	11

Technical Data

Filter Media	100% Synthetic Material
Media Efficiency	MERV 11, ASHRAE 52.2
Media Support	Wire Mesh on Downstream Side
Frame	High Wet Strength Beverage Board
Rec. Change-Out	1.0" w.g. Final Resistance
Maximum Temperature	200 °F (93 °C)

Performance



Technical Notes:
1. Pleated panels are constructed of 100% synthetic filter material.
2. Filter media is bonded to the coated frame using adhesive to prevent air bypass.
3. Filters are MERV 11 when tested in accordance with ASHRAE 52.2 testing standards.
4. Frames are constructed of high strength moisture-resistant beverage board materials.
5. 1" and 2" depth filters are supplied 12/case. 4" depth filters are supplied 6/case.
