

CH Dynamic Height Adjuster

- Dynamic style offers both height and slope adjustment after installation
- Saves time on piping installation-No need to install temporary supports
- Fine tune slope for process lines to achieve full drainability
- 1-1/2" of total travel length (3/4" length of adjustment from mid-point setting)
- Assembly includes CH Dynamic housing
- Shorter offset dimension than standard CH Height Adjuster
- Economical option in comparison to standard stanchions, where permitted
- Wrench flats for easy adjustment adjacent to the tube support
- Internal O-Ring seal to keep out any fluids
- Captive design for safety
- **ASME BPE** Compliant-No exposed threads, drainable geometry

Part Number: CH-HA-T-1

The Height Adjustment Coupling:

This coupling is designed for fine tuning of the elevation on hangers to get the proper slope for drainability. It can be used in conjunction with our stanchions or by themselves. The hygienic design of this coupling incorporates an integral o-ring seal and has a travel length of ½ in. Socket weld connection (Size to suit).
